Floss list for crosses

To calculate the size of a cross stitch design for a pattern that is 200 x 200 stitches, assuming you are using 14-count fabric, here's the process:

Identify the Fabric Count: We'll use 14-count fabric, which means there are 14 stitches per inch.

Calculate the Size in Inches:

For both width and height: Divide the number of stitches (200) by the fabric count (14). So, 200 stitches / 14 stitches per inch = approximately 14.29 inches.

Calculate the Size in Centimeters:

Convert inches to centimeters (1 inch = 2.54 cm).

For both width and height: 14.29 inches * 2.54 cm/inch = approximately 36.27 centimeters.

Therefore, for a 200 x 200 stitch pattern on 14-count fabric, the design will approximately measure 14.29 inches (36.27 cm) in both width and height.

Remember to include extra fabric around the edges for framing or finishing your cross stitch project.
