How to Convert Cross Stitch Pattern Sizes: A Step-by-Step Guide (190 x 300 Stitches)

When a pattern shows "190 x 300 stitches," converting that to actual size depends on the fabric count—how many stitches fit into one inch. This guide uses 14-count Aida fabric, a popular choice for cross stitchers.

Understanding Fabric Count

Fabric count = stitches per inch.

14-count Aida means 14 stitches fit in one inch of fabric.

Example Calculation for 190 x 300 Stitches on 14-Count Aida

Given:

Design size: 190 x 300 stitches

Fabric count: 14-count Aida

Steps:

Convert stitches to inches:

Width: $190 \div 14 = 13.57$ inches

Height: $300 \div 14 = 21.43$ inches

Convert inches to centimeters (1 inch = 2.54 cm):

Width: $13.57 \times 2.54 = 34.47$ cm

Height: $21.43 \times 2.54 = 54.43$ cm

Summary of Dimensions for 14-Count Aida

Width: 13.57 inches (34.47 cm)

Height: 21.43 inches (54.43 cm)

Conclusion

With a simple calculation, you can determine how much fabric you need and how your finished design will fit. Always leave extra fabric around the design for borders, framing, or finishing.
